

ASX/Media Announcement

15th June 2016

VIDEO INTERVIEW WITH MANAGING DIRECTOR AND CEO KEN BRINSDEN

Australian strategic metals company Pilbara Minerals Limited (PLS: ASX) (“Pilbara” or “the Company”) is pleased to advise that *The Sophisticated Investor* conducted a recent interview with the Company’s Managing Director and CEO, Ken Brinsden, in Perth.

The wide-ranging interview provided an update on Pilbara Minerals’ recent progress outlook, highlighting the key features of the Pilgangoora Lithium-Tantalum Project, an update on the Pilgangoora Definitive Feasibility Study, an overview of the lithium market and upcoming news-flow for the second half of 2016.

A copy of the video can be found at <http://thesophisticatedinvestor.com.au/coverage-video/?filter=gold-coast-2016&report=pilbara-minerals-management-update-june-2016>

The video will also be available shortly on the Company’s website home page under “Featured Highlights” at www.pilbaraminerals.com.au.

More Information:

ABOUT PILBARA MINERALS

Pilbara Minerals (“Pilbara” – ASX: PLS) is a mining and exploration company listed on the ASX, specialising in the exploration and development of the specialty metals Lithium and Tantalum. Pilbara owns 100% of the world class Pilgangoora Lithium-Tantalum project which is the second largest Spodumene (Lithium Aluminium Silicate) project in the world. Pilgangoora is also one of the largest pegmatite hosted Tantalite resources in the world and Pilbara proposes to produce Tantalite as a by-product of its Spodumene production.

ABOUT LITHIUM

Lithium is a soft silvery white metal which is highly reactive and does not occur in nature in its elemental form. It has the highest electrochemical potential of all metals, a key property in its role in Lithium-ion batteries. In nature it occurs as compounds within hard rock deposits and salt brines. Lithium and its chemical compounds have a wide range of industrial applications resulting in numerous chemical and technical uses. A key growth area is its use in lithium batteries as a power source for a wide range of applications including consumer electronics, power station-domestic-industrial storage, electric vehicles, power tools and almost every application where electricity is currently supplied by fossil fuels.

ABOUT TANTALUM

The Tantalum market is boutique in size with around 1,300 tonnes required each year. Its primary use is in capacitors for consumer electronics, particularly where long battery life and high performance is required such as smart phones, tablets and laptops.
